The State Medical Association.

The physicians' association of this State will hold its annual session in this city, commencing at 2 p. m., to-day. The daily sessions will be held in the Senate Chamber at the Capitol. The first meeting this after moon will be opened with an address of welcome by Dr. Blaird, of this city. The response-and routine business will consume the rest of the afternoon session. This evening the most notable event of the session will occur. Dr. Gilnon, Chief Medical Director of the United States Navy, will deliver his famous lecture, "Health the True Nobility," Dr. Gilnon is one of the most able and entertaining talkers engaged in lecturing on special subjects. A paper read by him last year before the Medico-Legal society of New York, on the necessity of tovernmental intervention to prevent the spread of veneral disease, has already won a world wide fame for the author. His position has given him exceptional opportunities for observation in all the countries, almost, of the globe, and he speaks "as one having authority." His subject this evening, the public health, is one of absorbing interest, and with his fame and ability, ought to attract a large audience. The President's annual address, by Dr. Reeves, of this city, will also most probably be made this evening. The evening session will be held in the half of the House of Delegates, and the public at large is cordially invited to be present and listen to Dr. Gibon's lecture and the address. To-morrow evening a complmentary concert under the management of Mr. C. Y. Lucas, will be giyen to the members of the Association at the Academy of Music. A most attractive programme has been pregared. After the concert a banquet will be lendered the visiting doctors at the St. James Hotel. It is hoped and believed that the session of 1829 will be a memorable episode in the history of the society.

in City Council last night was the ordinance city and vicinity met at the Riverside Iron prescribing rules and regulations for the government of the new Board of Public Works. The rules were read severally for discussion or amendment. An amendment was adopted requiring the clerk of the Board to give bone

into contracts and cause work to be done at its own discretion.

Mr. Kimberly announced that he would oppose the whole thing-both the Board of Public Works and the Water Board-for the reason that it was proposed to take all the revenues of the city but about \$95,009, which sum must meet an annual expenditure of about \$125,000.

It was finally voted to give the Board au-thority, to make all contracts for expendi-

for, and until this was done who would not vote to deplete the city treasury to support this board. Armstrong moved to strike out the whole section, and Smith seconded the motion. This motion was lost. Mr. Davis moved to lay the rule on the table. Lost. Mr. Hifdreth moved to adopt the rule as given above, and on this question Mr. Kimberly demanded the ayes and nors. Mesers. Haller, Hildreth, Hoffmann, Robinson, Wingerter and President Scott voted aye, and all the other members present no. The rule was thus rejected.

Mr. Laughlin offered as a substitute for Rule 8 the following:

Mr. Laughlin offered as a substitute for titule of the following:

"The Board of Public Works shall prepare an estimate of the amount required for the expenses of the Board of Public Work, and Council may appropriate such an amount as they may order."

This was adopted.

The Council was made the arbiter of difficulties between the different boards, instead of the City Solicitor.

Rule 25, as submitted, read as follows: "When any street, alley or public place of the city is about to be improved by paving macadamizing or by any other method, it shall be the duty of the floard to give twenty days' notice thereof to the owner or owners, of any tots or pieces of ground upon which buildings have been erected on the line of said street, alley or public place, or adjacent thereto, directing them to make connection with the water and gas mains, and public sewers, if any exist and inderlie said street, alley or public place, for the purpose of conducting water or gas into said studings or drawing the waste water therefrom. Said connections shall be made and completed within twenty days after the giving of said notice; and any owner or owners, or lae agent of any owner or owners, or lae agent of any owner or owners, or lae agent of not less than ten nor nore than lifty dollars and the costs of prosecution, and each day's failure or refusal to comply with said notice shall constitute a separate oftense."

Mr. Baker objected to this. After some discussion, which proceeded in a delightfully informal way, and in which Mr. Armstrong, as usual, did most of the talking, the rule was amended so as to make the city pay for the pipe, this express to be collected from the property owner when he makes connection with the service pipe. The provision that the property owner should be fined was, however, left in.

The rule requiring plumbers to make a deposit of \$20 before digging into any street, to be forfeited if the street was not restored to its original condition, was adopted, but made general, applying to "inclusive distance of t

The match was for fifty dollars a side, "catch as catch can," best two in three rounds, English rules.

Both men were in prime condition, and betting was even on the start. The match ended in a draw after three rounds, Tokay winning first, and Stumpp second. In the third round a foul was claimed by both sides and the match ended. The time was thirty minntes, Charlie Fraher and Henry Robrecht neted as judges.

Tokay and Stumpp will try another tussle in a the old fair grounds, Wheeling Island, to-day at 6 r. m. when great sport may be expected, as there is considerable money wagered on the result.

The East Wheeling Scandal.

The East Wheeling Scandal.

Mr. Ustleton, not Hustleton, as his name was printed yesterday, objects to some statements made yesterday concerning the alleged abortion which has been a subject of gossip in East Wheeling for some days, and which was mentioned yesterday in these columns. He is not an uncle of the girl, and he also denies that he ever publicly stated that he say the girl and the young man she first accused of her ruin visit a certain doctor's office together in a buggy. Neither, he claims, did he ever circulate a report that he had seen the couple together at Bellaire. We give him the benefit of his denial. The girl left the city vesterday for her home down the river. There are still a some very mysterious facts in connection with the stories circulated, but as no official steps have been or will be little doubt, but the produced there can be little doubt, but the real partner or partners of the girl's crime will probably never be reliably known.

Mr. Ed. Rogers, Vice President of the district, was at the head of the mill workers, and
Hon. C. D. Hubbard presided over the joint
meeting.

Ifon. C. D. Hubbard presided over the joint meeting.

The association's committee submitted the mailers', nollers' and heaters' scales, to go into effect June 1. The effect of the propositions has been already stated in theseolumus. The manufacturers stated the result of their deliberations in the afternoon, with the information that that was their final reply to the demands of the workmen. The latter replied that the manufacturers had also their ultimatum, and without any discussion the conference adjourned.

There is not room for any doubt that the result will be a serious and lengthened lockout, the consequences of which to the community can scarcely be estimated.

Alarms of fire seem to awaken very few people lately. Monday night the stable of Chomas Mr. Caffrey was set on fire. The fire was put out before there was time to make much of a confagration; but the situation of the stable, between the B. & O. bridge and Grescent street, surrounded by frame houses and stables built close together, makes it a dangerous place to start a fire. Only a few nights ago the same man lost a horse by the burning of a shed in which it was kept, and an unsuccessful attempt had been made to burn the same shed a few weeks before. This is a kind of persistence in a devilish object that deserves a long rope and short shrift, Different reasons are given for suspecting entirely different persons on entirely different grounds.

STRENGTH

to vigorously push a business, strength to study a profession, strength to regulate a household, strength to do a day's labor without physical pain. All this represents what is wanted, in the often heard expression, "Oh! I wish I had the strength!" If you are broken down, have not energy, or feel as if life was hardly worth living, you can be relieved and restored to robust bealth and strength by taking BROWN'S IRON BIT-TERS, which is a true tonic-a medicine universally recommended for all wasting diseases.
